

TO DISCOVER AND PROTECT: Endangered worlds of water ecosystem and it's biodiversity

The project was funded from The Programme „**Environment, Ecosystems and Climate Change**“ financed from Norway Grants 2014 – 2021

The project deals with 4 themes identify current problems from the view of contemporary state of aquatic ecosystems and their biodiversity.

1. Invasive species in freshwater ecosystems
2. Fish migration and barriers on watercourses
3. Importance of non-productive functions of fishpond
4. Sustainable aquaculture

The goal of the project is to motivate target groups to behave in a more responsible way concerning the protection of aquatic ecosystems and their biodiversity.

Amount of support: 1 300 000 CZK

Support recipient: FFPW USB
